Stackable: When the appliance is not in use, the top part of the unit can be placed in the collection tray in order to save storage space.

10-layer filter: Clean air thanks to the 10-layer anti-allergy filter.

Removable water container with water level indicator: The water container can easily be removed.

Possibility for permanent water drainage: By fitting a flexible water drainage tube a continuous water discharge can be realized. If done correctly, it will prevent the need for emptying the water container.

Full colour box: The unit is delivered complete with auxiliary parts within a full coloured box, displaying the applications and operation information in several languages.

24 hour timer: The unit is equipped with a timer function which can switch off the unit at any hour.

Large size, removable water tank: For ease of use, the dehumidifier has a extremely large watertank capacity. The frequency of having to empty the tank is significantly reduced, with this large sized water tank.

Hygostat: The humidity can be regulated via an adjustable hygostat.

Easy to use: The device adapts to the room conditions. It alternates between silent and full power mode to maintain a humidity level of around 50%. When the water tank is full, an acoustic signal sounds and then the device switches off.
