

BWK 1651

WINE COOLER

Product data sheet

Product range	Wine Cooler
Brand name	Qlima
Model	BWK 1651
Positioning	Built-in
EAN code	8713508773735

Technical specifications

Standard bordeaux bottle quantity (750 ml)	bottles	51
Total internal value	L	135
Energy efficiency class		B
Number of zones		2
Power consumption	W	120
Mains voltage	V / Hz / Ph	220-240 ~ / 50 / 1
Current (nom.)	A	1.4
Temperature range int. min-max (zone 1 / zone 2)	°C	5 - 12 / 12 - 22
Compressor / thermo-electric		compressor
Number of storage layers		6
Shelf type		wood
Interior light		Yes
Control		Electronic
Electronic display		Yes
Reversible door		Yes
UV-protection glass door function		Yes
Sound power level ***	dB (A)	43
Dimensions (w x d x h)	mm	595 x 575 x 870
Nett weight	kg	43
Refrigerant (type/weight)	./gr	R600A/43
Compressor type		Rotary
Protection class	IP	X0
Climate class		ST/T
Guarantee	years	2

BWK 1651 WINE COOLER

Internal ventilation

Vibration protection

Interior light

UV protected glassdoor

Scent filter

Usable in cold environment

Features

Built-in wine cooler

This wine cooler is designed to be built into existing counters and cabinetry as they include a front vent located under the door that channels heat forward away from the unit.

Internal ventilation

The temperature inside is distributed evenly through out the wine cooler. Preventing hotter / colder zones.

Vibration protection

Vibrations disturb the naturally occurring sediment in wine, which will disturb the natural aging process of wine. Vibrations cause movement which will age wine and cause excessive heat. This Qlima wine cooler is designed to limit vibrations to a minimum so that your wine rests disturbance free.

Electronic display

The unit is equipped with an electronic display which provides clear information and is easy to read.

Interior light

The modern blue interior LED-light is helpful when viewing and selecting from your wine collection. It also make the wine cooler an eye-catcher in your kitchen or living room. The light can easily be switched on/off.

Scent filter

Some gasses in the air can deteriorate the taste of the wine rather fast. The cork will not stop this process. The active carbon filter in this Qlima wine cooler protects your wine from odors that could be detrimental to your wine.

UV-protection glass door function

UV rays can be extremely harmful to wine. This Qlima wine cooler has UV-protection glass in the door, so your wine is protected from harm and will remain in optimal condition.

Usable in cold environment

Due to the extra heating function in the lower zone the wine in the lower zone will be kept at the correct temperature even in cold ambient conditions!

Extractable wooden shelves

The high-end wooden shelves are partially slideable. This makes it easy to check the bottle or label of the wine.

Design

The Qlima wine cooler has a high-end stainless steel appearance.
